NAVEEN MURALIKRISHNAN

BACKEND/PRODUCT ENGINEER

Salem, India | +91- 8946002701 | naveenmuralikrishnan17@gmail.com | PORTFOLIO | LinkedIn

SUMMARY

Product-minded backend engineer with 3+ years at Zoho building enterprise messaging, permissions, authentication, and reusable platform services across SalesIQ and shared chat infrastructure. Owned backend work end-to-end, from design and API development to production rollout, incident response, and support-driven iteration.

WORK EXPERIENCE

ZOHO CORPORATION, Member Technical Staff — **JUN 2023 - Present**

- Owned backend development of SalesIQ Profiles, implementing feature-level roles and permissions for operators and strengthening administrative control across the application.
- Built SalesIQ Outbound from scratch for WhatsApp and extended it toward website-channel support, enabling proactive and broadcast messaging and expanding SalesIQ beyond support into sales workflows.
- Implemented JWT-based authentication for embedded chat widgets and built backend reporting support for proactive and broadcast modules.
- Redesigned subscriber operations in Arattai's messaging framework to reduce delay under load and offload overloaded servers, while introducing differentiated flows for subscriber-specific actions.
- Resolved a customer-reported production incident caused by excessive Redis reads on a public API, identified the root cause within 2 hours, and shipped a hotfix to restore service stability.
- Designed and implemented internal integrations between Zoho SalesIQ and Zoho Cliq, Zoho Projects, and Zoho Lens, enabling seamless communication, task tracking, and remote assistance workflows.
- Mentored 2 junior engineers in designing and developing an internal issue-tracking tool that improved coordination between support, engineering, and security teams for handling customer-reported issues. Enabled efficient triaging and resolution of vulnerabilities such as DoS, XSS, and IDOR, including ownership mapping via repo APIs and false-positive validation.
- Currently driving the extraction of the Visitor Tracking System (VTS) from a tightly coupled SalesIQ implementation into a reusable service/framework for broader product adoption.

Earlier roles: Project Trainee (OCT 2022 -JUN 2023), Summer Intern (APR 2022 - JUN 2022)

TECHNICAL SKILLS

- **Programming Languages:** JAVA, SQL, SHELL/BASH
- **Tools & Framework:** Struts 2, GIT, LINUX
- **Data & Infra:** MySQL, REDIS, KAFKA
- **BACKEND:** REST APIs, JWT

EDUCATION

B.Tech, Information Technology — **AUG 2019 - MAY 2023**

- Karpagam College of Engineering, Coimbatore
- CGPA: 8.62/10.0
